READ ME_RELEASE NOTES_artifakt-for-designers-2021

Internal release number v2.203

Distribution date April 28, 2021.

The "artifakt-for-designers-2021" package addresses naming updates and reassignments required for W3C web standards. Visual weight characteristics remained the same, but name mapping on some weights have changed per the table below.

Comparison table:

PREVIOUS Artifakt Names	2021 Artifakt Names (W3C compatible)	Font numerical weight
Hair*	Thin	100
Thin*	Extra Light	200
Light	Light	300
Regular	Regular	400
Book*	Medium	500
Medium*	Semi Bold	600
Bold	Bold	700
Black*	Extra Bold	800
Heavy*	Black	900
*Changed		

All design applications should begin to migrate to the new names ASAP. Uninstall old versions of Artifakt and install the new appropriate 2021 formats according to your application needs. Follow any missing font prompts and replace with the new names as shown in the comparison table. The visual characteristics and line rags in design files should not be affected if font replacements are remapped correctly.
